

Amendments to the Specification:

Please replace the paragraph beginning at page 12, line 3 with the following amended paragraph:

FIGS. 12A, 12B, and 12C illustrate details of flexible tube 104 that fits into opening 207 in toothbrush head 101. Flange 1202 fits into a mating groove retaining flexible tube 104 in toothbrush head 101 so that it is secure during brushing with bristles 106. Opening ~~[[1101]]~~ 1201 delivers toothpaste to substantially the top of bristles 106.

Please replace the paragraph beginning at page 11, line 25 with the following amended paragraph:

FIGS. 11A, 11B, and 11C illustrate details of cap 109 for toothbrush assembly 100. Cap 109 has holes 1103 for receiving mating features of clip 108. Feature 1102 is a groove for coupling to feature 302 on toothbrush head 101. Opening ~~[[1201]]~~ 1101 extends over toothbrush head 101.

Please replace the paragraph beginning at page 11, line 11 with the following amended paragraph:

FIGS. 8A, 8B, and 8C illustrate details of toothpaste chamber 105. Toothpaste chamber 105 has brush end 209 and plunger end 208. Grooves 808 mate with corresponding features 602 on nut 205 preventing nut 205 from rotating within toothpaste chamber 105. Groove 805 holds and retains O-ring 202. Feature 804 in toothpaste chamber 105 mates with features 308 on twist knob ~~[[204]]~~ 103. Toothpaste chamber volume 301 is modified by lateral motion of plunger head 203.
